Utilities

Surface, Contour, Manip, Fitz, Letz, Fitls

Version 3.2

MANIP is a general purpose data entry and manipulation package.

FITLS fits any equation with unknown constants to X,Y data.

FITZ allows surfaces to be fitted to X,Y,Z data.

LETZ allows a surface to be generated from an X,Y equation.

Evenly spaced Z data can be plotted using SURFACE or a contour of the data can be plotted on a normal GLE graph using CONTOUR.

GLE
